

COKE

2021 SINGLE CAB
Demo Vehicle

MILEAGE: 14,100

Up to date service records. Thoroughly tested in a variety of extreme conditions.

Launched with a production V8 cab over chassis, upfitted with CORE's proprietary four-wheel drive system, CORE has changed the way professionals and DIY overlanders build for total-control performance. Our custom-built CORE chassis are designed to withstand an unparalleled range of environments and situations. Tested to the extreme, CORE brings confidence and proprietary expertise to any build project. CORE has changed the way professionals and overlanding experts build for total-control performance.

81"

CORE vehicles' purpose-built footprint means a lighter, more agile vehicle, providing increased access.

With a track width comparable to a standard pickup truck, CORE vehicles are intuitive to drive and can access terrain larger vehicles can't.

Engineered for unparalleled reliability and 4x4 performance. Designed to be serviceable anywhere on the planet. Should something go wrong, the Isuzu platform can be serviced with an extensive global dealer network. All parts can be widely sourced at retail auto supply shops minimizing vehicle downtime.

224"

CORE's cab-over-engine platform increases driver visibility, creating a safer driving environment for all conditions.
